Introduction

CareNotes CAMHS provides the Trust with a single integrated solution for the recording, monitoring and sharing of information regarding the care provided to children and their families. CareNotes CAMHS supports operational patterns of health care delivery in multi disciplinary, multi skilled and collaborative forms of team based care. Designed in conjunction with CAMHS clinicians CareNotes CAMHS delivers,

- to the Trust – a fully integrated electronic health and social care record that covers all aspects of inpatients, outpatients, day and community care.
- to the users – an intuitive easy to use web based interface with functionality that mirrors and promotes best practice.
- to the patient – improved care due to availability of relevant information where ever and when ever it is needed 24hrs a day 7 days a week.
- to LSP's – a well established, proven, resilient and clinically driven solution that adds advanced mental health specific functionality, credibility and value to their mental health portfolio.

Technology

CareNotes CAMHS is built using Microsoft's .NET Framework 2, on a three-tier model using ASP.NET/Web Services, C# and SQL Server 2005.

CareNotes CAMHS can be deployed on local servers or hosted via an NHSNet based ASP and is accessed by web browser or PDA.

Management, user and reporting functions can be accessed from any PC which can access the organisations network, either directly or via a virtual private network (vpn), which provides powerful options for home-based or community-based working.

Functionality

CareNotes CAMHS users benefit from the following functionality:

- User defined case note structure.
- Complete Inpatient, Outpatients, Day Care and Community features.
- User defined assessment tools, care plans, care pathways and protocols.
- Advanced outcome monitoring and reporting features.
- Complete electronic clinical note and Care Planning functionality.
- Full support for the Care Programme Approach.
- Full support for multi-axial ICD10 clinical coding and analysis.
- Fully Mental Health Minimum Data Set compliant with comprehensive reporting features.
- Advanced user defined Alerting. CareNotes CAMHS can inform clinicians or clients via e-mail or SMS text message.
- Comprehensive feature for Substance Misuse, Psychology and Psychotherapy services.
- Fully caldicott compliant.
- User defined letter generation.
- Recording of prescribed and clients own medication.
- PDS and choose and book compliance by Jan 09 via the Connecting for Health existing systems compliance project.
- Intergration with PDA and Smartphones.
- Intergration with Microsoft office.
- Complete system administration and set up via a web browser.
- CAMHS minimum data set and CORC compliant.

Summary

Child and family mental health is perhaps the most challenging of all mental health disciplines. CareNotes CAMHS supports the multi disciplinary care process by being a proactive member of the care team. CareNotes CAMHS ensures that appropriate information is recorded and shared with other members of the team at all stages of the care process.
